

Docket No. 2001-121-TAP

CLAIMS:

What is claimed is:

- 1 1. A system for relocating elements within a storage
2 library, the library comprising a plurality of adjacent
3 horizontal arrays of storage cells and at least one robot
4 that moves along the horizontal arrays and can retrieve
5 objects from and place objects into the storage cells,
6 the system comprising:
7 at least one guide rail at a common end of the
8 adjacent horizontal arrays; and
9 a means for moving components along the guide rail,
10 wherein the components are moved from a first horizontal
11 array to a second horizontal array.
